

FACIAL ANATOMY AND PLANNING SAFE TREATMENTS

INTRODUCING HEALTHCERT EDUCATION

HealthCert Education is a global professional education provider dedicated to saving lives and improving patient outcomes through accredited primary care education for medical professionals. HealthCert Education does not accept sponsorship or commercial interest investment when delivering course content.

PREREQUISITES (MANDATORY)

There are no prerequisites.

RECOMMENDATIONS (OPTIONAL)

Introduction to aesthetic medicine.

COURSE CONTENT

Understanding facial anatomy is critical for successful aesthetic treatment outcomes. Patient considerations include gender, race, age, medical history (including previous facial treatments), face shape and other considerations. There is a detailed focus on the facial sub-units, innervation, vascularization, lymphatics and musculature systems of the face and neck. These areas are crucial when evaluating a patient for safe aesthetic treatments and determining the appropriate treatment modality. The signs and symptoms of potential adverse outcomes are included.

This course is evidence-based, demonstrates best practice and is regularly updated.

RELEVANCE TO GENERAL PRACTICE:

The concern that consumers often make rushed and ill-informed decisions to have these procedures done is real. As general practitioners (GPs), our role is to provide the best possible advice and care to our patients in all areas of their health. As such, GPs are in a key position to support patients who have cosmetic concerns. GPs need to be educated in how to safely support patient concerns in aesthetic medicine.

The need to educate GPs is further reinforced in the Ageing across the life span: time to think again article by GE Pierard. 'Over the past decades, understanding of ageing skin has considerably expanded, with a welcome emphasis on differentiating true chronological ageing changes from photoageing (Table 1) resulting from habitual chronic sun exposure. 18–21'.¹

LEARNING OUTCOMES:

1. Distinguish basic facial anatomy and evaluate safe treatment.
2. Determine key elements of facial anesthesia and assess safe practices.

PRESENTER:

This course is presented by Dr Chris Clifopoulos. Principal doctor at Croxton Medical Centre, Dr Chris Clifopoulos established the practice shortly after completing his training as a resident doctor in St. Vincent's Hospital, Melbourne. He then obtained his equivalent qualification in Athens. Chris obtained his First Part qualification training for the Royal Australasian College of Dermatology in 1995. He also completed a postgraduate diploma of Epidemiology and Biostatistics in 1997 at the University of Melbourne. He completed his Master of Skin Cancer Medicine through The University of Queensland in 2011.

FACIAL ANATOMY AND PLANNING SAFE TREATMENTS

RECORDING:

Listen and learn about facial anatomy and planning safe treatments in aesthetic medicine and how they can be used to guide treatment. The recording can be paused at any point to reflect on content and has a sophisticated search option for locating specific topics. You can copy and paste key slides into your personal document for ongoing reference.

RECOMMENDED READING:

There are recommended open access readings and articles to enhance learning.

CASE DISCUSSIONS:

There are interactive case discussions to reinforce learning, where participants are encouraged to research, view other responses and discuss topics with other participants. Expert answers are provided once case discussions are submitted.

ASSESSMENT:

There are two online multiple choice examinations for assessment:

- Knowledge-based questions.
- Scenario-based questions with a focus on cases of patient care in the clinical environment.

Assessment is not timed and can be repeated if the 80% pass mark is not achieved with the first attempt.

ACCREDITATION:

HealthCert courses align with the continuing professional development accreditation requirements. This course qualifies for TBC hours for Educational activity and for TBC hours for Reviewing performance.

EVALUATION:

An evaluation at the end of the course enables HealthCert Education to continually improve education content.

FUTURE PATHWAY OPTIONS:

Further topics relating to aesthetic medicine can be viewed on www.healthcert.com. An online chat option on the web page provides you direct access to an Educational Advisor or, if you prefer email, info@healthcert.com. If you would like to speak to an educational advisor, please call 1300 856 695 (Australia) or +44 203 514 0688 (international).
